

Good_complex_with_comments
/good_mycomplex_with_comments.h

```
graph BT; A["Good_complex_with_comments  
/good_mycomplex_with_comments.cpp"] --> B["Good_complex_with_comments  
/good_mycomplex_with_comments.h"]; C["Good_complex_with_comments  
/good_testcmp_with_comments.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a header file box labeled 'Good_complex_with_comments /good_mycomplex_with_comments.h'. Below it are two source file boxes. The left box is labeled 'Good_complex_with_comments /good_mycomplex_with_comments.cpp' and the right box is labeled 'Good_complex_with_comments /good_testcmp_with_comments.cpp'. Two blue arrows point from the source files to the header file, indicating that both source files include the header file.
