

for lab/PracticalSocket.h

```
graph TD; A[for lab/PracticalSocket.h] --> B[string]; A --> C[exception];
```

The diagram illustrates the dependencies of the file 'for lab/PracticalSocket.h'. It is represented as a root node in a dark gray box at the top. Two blue arrows point downwards from this root node to two child nodes, 'string' and 'exception', which are in light gray boxes. This indicates that 'PracticalSocket.h' depends on both the 'string' and 'exception' headers.

string

exception
