

```
graph BT; A[Good_complex/good_mycomplex.h] --> B[Good_complex/good_mycomplex.cpp]; A --> C[Good_complex/good_testcmp.cpp];
```

Good_complex/good_mycomplex.h

The diagram illustrates a header file structure. At the top, a grey rectangular box contains the header file name 'Good_complex/good_mycomplex.h'. Below this box, there are two white rectangular boxes. The left box contains 'Good_complex/good_mycomplex.cpp' and the right box contains 'Good_complex/good_testcmp.cpp'. Two blue arrows originate from the bottom of the header box and point to the top of each of the two source file boxes, indicating that both source files include the header.

Good_complex/good_mycomplex.cpp
